

OTP reading library

This module contains functions for reading board information (e.g. serial number, MAC address) from the OTP memory of an XCore. This information can be written to the device using the XBURN develop tool provider by XMOS.

Software version and dependencies

This document pertains to version 2.0.1 of this library. It is known to work on version 14.1.1 of the xTIMEcomposer tools suite, it may work on other versions.

The library does not have any dependencies (i.e. it does not rely on any other libraries).
